

Sliding + Stacking Door

The Urban Stacking/Sliding Door has been designed to take advantage of the great outdoors, to deliver that perfect alfresco environment. Configurations of two, three and four-panel standard designs plus the added options of three or six-panel multi-stacking and corner entry options, allow for a high degree of design flexibility.

The door's excellent structural and weather performance is designed to suit Australia's wide range of climate conditions. Complemented with high quality surface mounted hardware, integrated insect or barrier screening options and double glazing capabilities ensure the Urban Stacking/Sliding Door can be tailored to your exacting requirements.
