## STUNNING DECODECK™...

...the aluminium decking system with the beautiful DecoWood™ wood grain finish. DecoDeck™ resolves many of the issues associated with timber decking such as poor durability, difficult installation, high maintenance requirements and sustainability.

Unlike other clip-in aluminium decking systems, DecoDeck™ accurately replicates the form of timber giving you the classic look of timber. DecoDeck™ never needs sanding back, painting, staining or oiling, and there are no deviant nails to punch back down.

DecoDeck™ is designed for easy installation so home owners have the choice of constructing the deck themselves or getting any builder to do the job. DecoDeck™ comes in 6.5 metre perfectly straight lengths, reducing wastage and installation time.

DecoDeck™ is ideal for coastal properties and bushfire prone areas where timber is not suitable due to harsher environmental conditions. DecoDeck™ and all its components are non-combustible and fully comply with BAL 40.

## EXPERIENCE DECOWOOD™

...the stunning timber look that never needs painting. DecoWood™ combines the natural beauty of timber with the proven strength and durability of aluminium.

### BEAUTIFUL

DecoWood™ offers a choice of fourteen beautiful wood grain finishes, all with a natural textured finish.

### DURABLE

DecoWood™ is a marine grade powder coating that boasts a ten year limited warranty. Unlike timber, DecoWood™ aluminium is long lasting and dimensionally stable, meaning it will not warp, split, rot or crack.

### SUSTAINABLE

Using DecoWood™ instead of timber reduces the need for logging and the amount of harmful greenhouse gases (Volatile Organic Compounds) released into the atmosphere from painting and staining.

DecoWood™ aluminium products are easily recycled, can be recycled many times and require little energy to do so.
